

Transatlantic Summer Academy

The Impact of New Technologies on Intellectual Property: Where do we stand in Europe and in the US?

16th Transatlantic Intellectual Property Summer Academy

June 12-14, 2023 at Universidad Carlos III de Madrid (UC3M; Carlos III University of Madrid), Spain

Campus Puerta de Toledo, Madrid

Private Law Department UC3M, Master in Intellectual Property UC3M, Research Project PDI2020-115352GB-I00.MCI (“Damages in the digital environment: new challenges for compensation”), financed by AEI/10.13039/501100011033.

During the course of one week each year, Carlos III University organizes or takes part in the Transatlantic Intellectual Property Summer Academy jointly with other prestigious schools and universities of Europe and North America. Faculty includes highly-regarded academics from top-ranked law schools around the world, including Bocconi University.

The course features leading IP scholars and researchers from multiple countries in Europe and North America. The number of participants is limited to 50. Attendees must meet one of the following:

- have a graduate degree in law, economics or engineering;
- have an undergraduate degree in law (subject to a selection procedure);
- be a current American JD or graduate student; or
- be a young researcher or professional working in TTOs.

The program costs €600. Lunch is included. Participants are responsible for booking their own travel, accommodation and other meals.

A participatory and interactive teaching approach is used for all lessons, including business examples and studies, practical exercises and direct contact opportunities with IP operators and companies. Free tutor assistance is also available.

An optional daily recreational program is available in advance to participants and includes invitations to cultural and social activities at free or limited costs.

Entry requirements are indicated below.

Attendance certificates are granted at the completion of the program below.

REGISTER NOW at <https://www.uc3m.es/continuing-education/impact-new-technologies>

4. Program Details

Program contents include inter-disciplinary high-level teaching on intellectual property, Internet technology and international economic law and policy (as per details below), with added value in each of the following fields:

- North American, European and International IP and Digital Technologies;
- North American, European and International IP and AI Law, Policy and Practice;
- North American, European and International IP as a tool for Researchers;
- North American, European and International IP and Business /Digital Business operational models.

As a result of their attendance to the Transatlantic Summer IP Academy 2023, participant lawyers, economists, scientists and engineers, as well as business specialists (at student or young professional level) are to:

- enhance, thanks to lectures by the best international IP specialists, their international knowledge in their own field of expertise;
- better embrace intellectual property, high-tech and digital business globally, as a subject item at the crossroads between different stakeholders.

For all lessons, a participatory and interactive teaching approach is chosen, involving business case examples and studies, practical exercises and direct contact opportunities with IP operators and companies in a dynamic, horizontal and open work environment. In addition, free tutor assistance will be available to the participants, in order to ensure cohesion between the participants.
