07/05/2021	07/06/2021	Madrid	Carlos III de Madrid	5	8	8	5	8	7	8	7	the discussion in each session helps me a lot to get the direction to determine some important parts of my research, such as discussion about the research gap.	In my opinion, the webinar overall was really good. If I can suggest, it will be better to add more examples of the sample of research or thesis which use the methods of idea puzzle. I am coming from the law department, unfortunately, there is no example of law research that uses the method of idea puzzle. However, every department has its own way to work with	Finding a research gap is one of the most important topics that could justify other future webinars. It is also related to one of the parts of the idea puzzle method.	6	7	It was so useful to help the student including me to manage every part of the research. It also helps the student to their guideline when working with their research.	It will be better if there is more explanation as a guideline in every single part of the idea puzzle when the student fills the question in the software.
07/05/2021	02/06/2021	Madrid	Universidad Carlos III de Madrid	9	9	9	9	9	9	9	9	Theoretical, methodological and empirical points.	Yes, I suggest to extend the webinar period to two days. The second day will be to discuss the final triangle design notification.	Research idea puzzle design.	9	8	PhD research	No, I dont have.
07/05/2021	23/05/2021	Madrid	UNIVERSITY CARLOS III OF MADRID	5	6	8	5	8	9	7	6	Learning about a research development software	Separate the webinar for each field of study: engineering, humanity, art and etc.	How to present our research to the non-specialized audience in a short time.	2	6	Practically nothing, but theoretically helped a little in recognizing the type of project in terms of classification.	The software questions were too philosophical and incomprehensible to an engineer.
07/05/2021	20/05/2021	Madrid	Universidad Carlos III de Madrid	8	9	9	8	9	10	9	9	Helping me to summarize the two most important keywords.	Maybe the slides can be shared to students for their further thinking to develop their research design.	For me, I suppose I need go deeper into the "analysis techniques" topic.	8	9	Help me to polish my initial research plan and make it simpler and more concise.	Improve the consistency between the UCM research plan requirements and IdeaPuzzle research design format.
07/05/2021	18/05/2021	Madrid	Universidad Carlos III de Madrid	8	9	9	9	10	10	9	9				9	9		
07/05/2021	18/05/2021	Spain	Carlos III	10	10	10	10	8	10	10	10	Very useful to build the thesis project. The professor is very solid theoretically and knows how to explain assertively.	It may be useful to share each other's projects prior to the meeting so that students do not get lost as much when the teacher addresses a specific project topic.	Everything that has to do with strengthening thesis projects.	10	10	With the software, I put together the preliminary thesis project. After that, designing the project was much easier.	-
07/05/2021	18/05/2021	Madrid	Universidad Carlos III de Madrid	10	10	10	10	10	10	10	10	In general, all the points were interesting, the speaker clearly explained each point to be discussed and the feedback and communication with the participants was excellent	I just hope that seminars like this continue to be held that help improves our research projects.	It would be interesting to delve into the aspects related to the techniques of analysis, data collection, and processing, types of analysis, etc.	10	10	Define more clearly the strengths and weaknesses in the planting from my research, with the aim of reinforcing them and achieving a better final result	Greater dissemination among researchers.
07/05/2021	18/05/2021	Madrid	Universidad Carlos III de Madrid	9	9	9	9	9	9	9	9	All 21 points	Yes extending the sessions	Idea puzzle software	10	10	My PhD thesis	No
