

Transversal reflections on science: the importance of more and better science

UC3M Academic coordinator: José Manuel Torralba (torralba@ing.uc3m.es)

1 cross-curricular credit (*formación transversal*) per series

Language: Spanish

Online/Offline activity. Free registration.

Series I (2019-2020). 9 conferences. Application period for credits closed.

Series II (2020-2021). 10 conferences. Start date: 17th of November.

www.reflexionesciencia.es | [YouTube](#)

These webinars are based on a number of questions arising from the current pandemic and subsequent lockdown situation that undoubtedly are going to change, if not changing already, many ways of addressing work for all working in science and universities. What will happen to science and universities after the pandemic? What is the future ahead? Has society realized that there is no future without science? Will our politicians forget about us after the pandemic?

The Doctoral School offers one cross-curricular credit per series for this activity.

Requirements to apply for one credit for Series II:

1. Download and fill out the application form available on our [website](#), then submit it to gestiondoctorado@uc3m.es (indicating “Formación transversal” or “Cross-curricular training” on the subject line). It is required that the form is signed by the thesis tutor or advisor by handwritten or electronic signature.
2. Follow the conferences on the webinar’s [Youtube](#) channel, either live or recorded. See next page for further details on dates and schedule.
3. Write a brief critique of every conference (máximum length: one page per conference) and submit it to the coordinator, Prof. José Manuel Torralba (torralba@ing.uc3m.es). Submission deadline: **20th of June, 2021.**

The credit will be granted to all students with a passing grade.

Series II

Start time according to Spain Peninsular Time.

17th of November, 2020 | 17.30 h.
