

Entrepreneurship & Innovation Support Service

UC3M Science Park

BUSINESS INCUBATOR

Technology - based firm portfolio

Activa Proyectos Tech, S.L.

Wireless and sensor based technology focused on irrigated agriculture and professional gardening industries. Saving water, optimization of resources, productivity and sustainability improvement. Everything operated from your Smartphone and PC (IoT).

www.plantae.garden

Aeon-T CT, S.L.

Development of manufacturing technology that allows to make the usage of carbon fiber profitable in automobile production.

www.aeon-t.com

Agroaerospace S.L.

A technology company that offers a new aerospace flight control system independent of atmospheric conditions, applicable to aerial platforms and satellites. In the precision agriculture sector, it markets artificial intelligence software for reducing chemical fertilizers in crops.

<https://www.sanzar-group.com/>

Ahyres Hardware and Software, S.L

It develops unmanned aerial systems (UAS) for autonomous operations beyond visual line of sight and for collaborative operations (Swarming), for manufacturers and operators. This includes hardware, designing electronics, avionics, communications, electric propulsion systems, and payloads, as well as software for control, navigation, sensing, and UAS management.

<https://ahyres.com/>

AI-METHODS, S.L.

They leverage artificial intelligence to help organizations, companies, and aviation professionals improve their decision-making by accessing the best possible weather information.

<http://www.aimethods.com/>

Altum Sequencing S.L.

Altum's developed and patented technology allows the detection of cancer cells with an unprecedented accuracy. Therefore we can discern patients with a high risk of relapse, and both help medical oncologists to decide when and how to treat patients and provide them a better understanding of the illness evolution.

www.altumsequencing.com

Aptent Soluciones, S.L.

Technology-based and socially responsible company whose aim is to shape an accessible and barrier-free communication world. Its main activity is providing services and communication solutions for people with disabilities.

www.aptent.es

Anzen Aerospace Engineering, S.L.

We do safety y reliability analysis for systems, components and equipment. Currently we are working for leading national and international companies, in industries such as aerospace, defence and autonomous vehicles.

www.anzenengineering.com

Bitergium, S.L.L

Helps companies and organizations working on Open Source and Inner Source Software to manage and understand software development processes, their communities and their key performance factors.

www.bitergia.com

Capital Certainty, S.L.

Intelligent systems, information search and management, e-learning, e-government, global optimization in renewable energies and automated consulting.

www.capitalcertainty.es

CASSINI GEOPOLITICAL CONSULTING, S.L.

Specialized in geopolitical analysis, strategic intelligence, and cartographic production in various fields, such as natural resources, economic development, migration, climate change, cyberspace, security, and land use planning, among others.

<https://cassini.group/es/incio/>

Cedrion CTI, S.L.

Design, development and manufacture of ionic wind devices, with 2 main applications: virus and bacteria inactivation through cold plasma for Food and Health companies; and aerospace electronic devices refrigeration.

www.cedrion.com

Cyclomed Technologies S.L.

Compact particle accelerator for energy applications.

<http://cyclomed.tech/>

Digital Anatomics S.L.

Automatic generation, by the surgeon or dentist themselves, within minutes, of 3D virtual biomodels from TAC 2D images, which support surgical planning.

<https://digitalanatomics.com/>

Evidence-Based Behavior, S.L.

Integrated consulting solution for the functional evaluation of psychiatric patients with benefits for health professionals, for patient and caregivers.

www.eb2.tech

Global Incubator, S.L.

Design, virtualization and acceleration of open innovation ecosystems. Offers technology to institutions through a personalized, white-label SaaS web platform.

www.globalincubator.com

Hiili, S.L.

Carbon data platform for carbon measurement across all digital services.

<https://hiili.org/>

Hydra Space, S.L.

It develops innovative technology and solutions in the space and communications sector. They provide efficient and optimized satellite IoT communications for sectors such as precision agriculture, infrastructure management, and environmental and ocean monitoring.

<https://hydra-space.com/>

IENAI SPACE, S.C.

IENAI SPACE develops electric propulsion modules for small satellites, completely scalable and adaptable to each client's needs. Additionally, they offer support and consulting services related to the platform architecture and the mission analysis.

<https://ienai.space/>

Inrobics

Inrobics proposes a new rehabilitation model using artificial intelligence and social robots to help children with functional or neurological disorders improve their quality of life.

<https://inrobics.com/>

Laboratorio Hipermedia, S.L.

LabHipermedia is a technological innovation company that offers an integrated solution in sports training and management.

www.labhipermedia.com

Leapwave Technologies, S.L.

It develops high-frequency interconnection technologies, offering innovative solutions that enable possibilities beyond the current capabilities of technology. Its fields of application include communications, industrial inspection, and electronic instrumentation.

<https://leapwavetech.com/>

Madrid Space, SL.

The company is an engineering company that offers high quality solutions, in particular, in the field of thermal engineering.

www.madridspace.eu

Occam Space, S.L.

It develops its own technology and products through the engineering, manufacturing, and testing of mechanisms (separation and release systems, among others), systems for satellites, and space launchers.

<https://occamspace.com/>

Persei Space, S.L.

Committed to finding technological solutions for the sustainable use of space, it develops products based on electrodynamic tethers—conductive ribbons that, once deployed in orbit, can provide onboard power and generate resistance or thrust without the need for propellant.

<https://perseispace.com/>

Power Smart Control, S.L.

Design, development and distribution of specialized software. Engineering services related to software, equipment and electronic systems used for control, conversion and conditioning of electric energy

www.powersmartcontrol.com

Proximus Analytics, S.L.U.

It provides large retail chains and brands with real-time information on buyer behavior when entering their physical stores.

<https://shoppermotion.com/es/>

Savia Innovation and Technology, S.L.

They provide customized, adaptable, modular, and sensor-independent solutions throughout the entire product development cycle, from concept to final integration.

<https://www.seeviatech.com/>

Unusuals, S.L.

A computer vision company specializing in the analysis of linear infrastructures.

<https://unusuals.ai/>

Unuware, S.L.

They create AI-based systems that ensure access to information for all individuals, minimizing human intervention and the resources needed to provide optimal service.

<https://unuware.com/>

Unmanned Technical Works,S.L.

Engineering services specialized in civil engineering, industrial inspections and precision agriculture using UAVs. Development and integration of new technologies in UAVs.

www.utw.es

Valar Space, S.L.

It offers flight mechanics solutions to satellite operators and provides flight mechanics services to various satellite owners through a software solution and internal experts, enabling companies to operate and maneuver their satellites safely.

<https://www.valar.space/>

Wisdom Technology, S.L.

Core technology to define, virtualize and accelerate entrepreneurship, innovation and knowledge.

www.capitalcertainty.es

60 Nd, S.L.

Design and production of instrumentation aimed at in vitro simulation of biological processes influenced by mechanical effects. Its goal is to develop and commercialize disruptive technology for inducing mechanical activations in cells using magneto-sensitive materials.

www.60nd.bio
