HOTELS & RESORTS

# We're looking for future leaders and experts to join our Commercial teams around the world!

## What to expect:

Progressing through this six-month programme, you'll work in different areas of the commercial department and get a general overview of our business. We want you to discover and understand what makes RIU Hotels & Resort special. Our greatest assets are our people and a philosophy based on the idea of "service with a heart".

You will mainly do a 2 or 3 week internship in some of the hotels in our chain, but you will also have the opportunity to do 1 month of on-site classes in Madrid. It's a great opportunity to start your professional career in one of the industry's leading brands. You'll get training and mentoring to help you make your way towards your goals. After successfully completing the programme, we would be delighted to set out a personalised career plan for you.

## What we look for:

Bachelor degree or above, in any related discipline, achieved in the past 3 years and between 0-2 years of working experience, preferably in the tourism industry. An additional Post-graduate programme in Digital Marketing, Revenue Management or similar would be a plus.

You must be fluent in English and at least one other language (preferably Spanish, French, Chinese, Russian, Arabic or German). As a global company, we need you to be ready to live and work in any of our locations around the world! You'll also need to have a head for business, a real interest in data and analytics and the confidence that you're the right candidate.

So, if you're ready to start your career in the commercial department of RIU Hotels, send us a short video telling us about yourself and your motivation to join us! You should use your first foreign language and show us your power in less than 2 minutes!

Qualifying candidates will be invited to join the next stage of the selection process.
