The MSc in Finance is a one year full-time official program of the highest quality (among the best 50 masters in financial markets in the world according to ranking by best-masters.com) run by a top European university (Universidad Carlos III) offered in Madrid (Spain).

The Master in Finance is taught totally in English and designed for students with an outstanding academic record and quantitative skills who have recently completed their undergraduate studies.

The Master provides students with the knowledge, techniques and tools necessary to develop a successful career in many different areas of finance. Our graduates develop their careers in investment banks, financial boutiques, private equity and financial departments in non-financial entities. Our faculty is composed of both academics with a PhD from prestigious worldwide universities and practitioners working in top positions in the financial sector.

CAIA and GARP Academic Parter. The program covers specific contents aligned with CAIA and FRM certification exams.

STRENGTHS OF MASTER IN FINANCE

INTERNATIONAL ATMOSPHERE
The Master’s programme is developed within a complete international atmosphere, allowing experiences to be shared with other students from many different countries and cultures. Data from previous editions showed that around 45% of students are not Spanish, coming from countries as Germany, England, Italy, France, EEUU, Colombia, Venezuela, Peru, China, Taiwan, and Russia among others.

HIGH QUALITY FACULTY
In this program scholars from academia (all of them holding a doctoral degree from a world class university) come together with professionals from top companies and financial institutions. These professionals provide a closer look at the techniques and tools that the labour market requires to pursue a successful career.

Our practitioners come from leading companies and institutions as BBVA, Santander Bank, Bank of Spain, Moodys, Endesa and Deutsche Bank.

INTERNATIONAL EXTENSION PROGRAM
The programme has exchange agreements with top universities in Europe (Tilburg University, Humboldt Universitat and Maastricht University) and America (The City University of New York or EAFIT) enabling study abroad for some additional courses.

Prestige of the University
Students highlight the relevance of having an official degree from such a top university in order to get a desired position. Some rankings about uc3m are:

- QS World University Ranking by Faculty in Social Sciences 150
- Top Master in Financial Markets in Spain
- 1st Spanish Business School in Accounting & Finance
- Master by Financial Markets in the world
- 1st AACSB Accredited Spanish Public University
- #36 Master by Financial Markets in the world
- #59 in the world (Tilburg University Economics Ranking)

The Master is taught over an 11-month period and it is organized in four 7-week terms. The 60 ECTS program consists of compulsory (27 ECTS) and elective courses (27 ECTS) plus an End-of-Master project (6 ECTS) where the student specializes in a particular topic under the guidance of one of our academic experts. Prior to official beginning of classes, on early September, there are some compulsory preparatory courses.

The elective courses are designed so that students can specialize in the particular aspects of finance that are best suited to enhance their careers.

Graduated from the Master’s in Finance program in 2013, and joined BBVA as soon as I finished. At BBVA I started working in global markets, as a liquidity and short term interest rates trader. After two years there I joined the operations department at BME Clearing (Bolsa y Mercados Españoles), later going back to BBVA to manage short-term bank liquidity (through interbank deposits, FX swaps, ECB auctions, etc). From my point of view, studying an MSc in Finance is clearly one of the best alternatives you can choose when you finish your undergraduate degree in order to acquire in-depth knowledge of all the financial areas and assets you can find in the market. Courses such as advanced derivatives, international finance and fixed income were solid preparation for the future undertakings and responsibilities at the workplace.

Almudena López (Spain)
Asset and Liability Management (ALM), BBVA (Madrid, Spain)

Graduating from the MSc in Finance in 2015, I found my current position at Bloomberg two months before finishing the program. I would like to highlight the balance between quantitative and practical teaching in the MSc in Finance, and the relevance of the teaching contents. The fixed income course has been by far the most beneficial up until now, allowing me to acquire a broad and technical understanding in a very short amount of time. One of the greatest advantages of this Master’s program is the collaboration of many practitioners whose lessons have been of great utility during the beginning of my professional career.

Alex Abad
Fixed Income Advanced Specialist, Bloomberg (London, UK)

Nowadays, I am working in a large multinational financial services consultancy and my current role requires expert knowledge in financial statement analysis, most major asset classes, and banking regulation. The quality of the overall teaching offered by both academics and professionals, both of which are considered leaders in their respective fields is clearly the most notable characteristic in this master. I was also impressed by the content of the master degree and the fact it covered a broad range of relevant and interesting subjects, all of which were taught to a very high standard. It is a challenging and rigorous master, and I would highly recommend the master to anyone interested in pursuing a successful career in finance.

Tim McDonald
Business Analyst in Finance Department (Wolters Kluwer Financial Services, Madrid)
One of the reasons why this Master is chosen by students is the outstanding quality of its faculty. More than 80% of the faculty hold a PhD from a top university and carry out research actively, publishing in the most prestigious journals. For each course, we combine academic professors with professionals from recognized companies. These practitioners come from BBVA, Santander Bank, Bank of Spain, Deutscche Asset Management (DWS), Bank of Sabadell, CNMV, Endesa, Repsol, EDP, Ferrovial, Montalban Atlas Capital among others, companies where our students usually undertake some of their internships.

Taking part in this MSc in Finance as a practitioner has been a great experience. The high calibre and talent of the students make it a challenge in many aspects, and at the same time, a very enriching time. “To teach is to learn twice” especially in this Master’s program, due to the diversity of nationalities and cultures among its students.

This makes every class an opportunity to transfer knowledge while combining different approaches and points of view. We focus on theory applied to market reality with actual examples about how the FX industry is evolving in very relevant areas such as regulation and eCommerce. The small class size makes the sessions more dynamic and participatory. Finally, it provides us with the ideal opportunity to identify and recruit good candidates for different investment banking positions.

Francisco Javier Fernández Fernández
Global Head of FX - Europe (Madrid, Spain)
Foreign Exchange Markets

It is a pleasure to participate in this master, as it is clearly a top program in Europe. I teach the Financial Markets course in which we introduce the main assets (equity, fixed income and derivatives) and the markets where these are traded. Student’s participation is key factor in this course. Students work in teams and present their results in class. For me, this master has two main advantages relative to other similar programs: the high-quality of the students (who are carefully selected by the Academic Committee) and the international atmosphere in the classroom (around 50% of students are not Spanish and come from very different countries around the world).

Mikel Tapia
Professor of Finance (Uc3m)
