ECTS credits / workload	ECTS credits are awarded based on the amount of effort required to complete each course. The official workload of a semester is comprised of 30 ECTS credits. Note: Please keep in mind that the average time taken by local students to complete their studies at TU Wien is more than the official length of studies (for Bachelor 6 semesters / Master 4 semesters). This means that the average workload is less than 30 ECTS credits. A workload of 30 credits per semester or 60 credits per year should therefore be considered as more than an average Austrian student would perform during a year and means a very high workload, often
	impossible to complete.
