

Measures to be adopted in accordance with Order 338/2020, of the 9th of March, as a result of the situation and evolution of coronavirus (COVID-19), 10-03-20

10th March 2020

In accordance with, Order 338/2020, of the 9th of March, all on-site teaching activities will be suspended for 15 calendar days, from the 11th to the 25th of March, including both of these days. In order to relieve the effects of the suspension on on-site teaching activities, the Vice Presidents of Studies, Lecturers, Strategy and Digital Education, Internationalisation and Universidad Europea, and Management have today released specific instructions, that include measures regarding the academic calendar, student assessments, the use of facilities, resources for distance learning or the travel of lecturers, among others.

University activities will continue to be carried out in accordance with the guidelines set out by the Departments of Health and Science, Universities and Innovation. In this respect, telecommuting, flexibility of working hours and staggered work shifts will be made available and unnecessary crowds will be avoided. Measures will be adopted in order to ensure a work-personal life balance.

At the present time, the University Community has not recorded any positive tests for cases of coronavirus.

On Wednesday morning, an information note agreed by public universities of Madrid will be issued and will compile the specific measures that affect all university personnel.

I am confident that the collaboration of the entire University Community will allow us to overcome this exceptional situation.

Madrid, 10th March 2020.

Juan Romo
President
