

RECTOR'S RESOLUTION OF 14 MARCH 2020 ESTABLISHING ADDITIONAL MEASURES RELATED TO THE HEALTH EMERGENCY CAUSED BY COVID-19

In view of the evolution of the health emergency caused by the coronavirus-COVID-19, and considering the declaration of the state of alarm decreed by the Government and in order to comply with the precautionary principle and legal certainty,

I RESOLVE

1. The temporary suspension of all University face-to-face activities, both those that take place on the campuses and buildings of its ownership - including sports facilities, services open to the public and the science park - as well as curricular and extracurricular practices that take place in companies and other institutions.
The competent Vice-Rectors' Offices, having heard the Centres, will adopt the necessary measures to promote the continuity of teaching and training activities by non-attendance means, as well as to adapt the evaluation of all of them to these extraordinary circumstances.
2. This suspension affects not only educational activity, but also research and management. Only the necessary on-site maintenance, surveillance and security services provided by the Management, in general, or the Vice-Rector's Office for Scientific Policy in relation to the laboratories and the science park will be maintained.
3. The residence halls will remain open as long as there are residents staying there, but their catering services will be restricted to them and closed to the public. The directors of the residence halls and the Manager of the Carlos III University Foundation, as the entity responsible for their management, will adopt the appropriate internal measures to preserve public health.
4. This resolution shall be effective from the moment of its publication and until further notice. In particular, the suspension of on-site activity in the laboratories and the science park will take effect as of Tuesday, March 17.

Getafe (Madrid), March, 14th, 2020.

THE RECTOR
Juan Romo Urroz
