## Master in Economics of Competition, Regulation and Markets (CReMa)

UNIVERSIDAD CARLOS III DE MADRID  
CENTRO DE POSTGRADO

Email: [master.crema@postgrado.uc3m.es](mailto:master.crema@postgrado.uc3m.es)

Official Master Degree accredited by the Spanish  
National Accreditation Agency (ANECA)

Specialization courses on regulated sectors  
are sponsored by:

redea alsa omie

 **CNMC**  
COMISIÓN NACIONAL DE LOS  
MERCADOS Y LA COMPETENCIA

  
Fundación Corell

**MIB** 

CReMa is a one-year, full-time, on-campus program taught entirely in English. It provides intensive training aligned with European standards, combining solid foundations in microeconomics and econometrics with advanced coursework in competition policy, regulatory economics, and applied case studies.

### What will I learn?

After acquiring the core tools of economic analysis, you will develop strong quantitative skills in microeconomics and econometrics and learn to apply them to real market and economic challenges. Through case-based analysis and data-driven work, you will train to use cutting-edge analytical tools to solve complex problems in competition and regulation. The program equips you for a successful career in economic consulting, regulatory agencies, and policy institutions operating at the frontier of applied microeconomic analysis.

### Who is going to hire me?

CReMa graduates are trained to work at a high technical level. They are natural candidates for:

- Economic consulting firms specialized in competition and regulatory matters.
- Competition authorities and regulatory agencies.
- Strategy and economic analysis departments in large corporations.
- PhD programs in economics at leading universities.

## Program

(C) = compulsory (42 ECTS)  
(E) = elective (12 ECTS)  
Master's Thesis (6 ECTS)

### FIRST SEMESTER

- Microeconomics Analysis (C) 6 ECTS
- Economic Analysis of Competition (C) 6 ECTS
