Part B. CV SUMMARY

I am Full Professor in the Mechanical Department of UC3M since December of 2019. My **research activity** is **focused** on vehicle dynamics, on designing of vehicle controllers to improve their handling, stability and comfort, on designing vehicle state observers, on mechatronics and on Artificial Intelligence such as Neural Networks and Fuzzy. My research has been conducting inside different research projects. The total number of **research projects** in which I have participated has been 14: 1 European Project, 11 national projects and 4 regional projects. I have been **principal researcher** of 2 national Projects and 4 regional projects. All of them have been related to vehicle safety. Additionally, I am principal researcher of the project “New paradigm of emergency transport service management: Ambulances (AMBULATE-CM)”, recently accepted. This is financing by Comunidad de Madrid. FEDER – RECURSOS REACT-UE and funding with **1.055.000,001 euros**. My research has generated more than 90 publications, 36 of which are journal articles belongs to JCR, 54 are conferences and 3 are international research book chapters. The total **funds received** as a **principal research** are about 1.300.000 euros.

The indicators of my **research performance** are (source WoS): **Total cites:** 828; **5-years Average citations** (2022-18): 99 and **h-index:** 15. Additionally, I am among the 2% world's most cited in 2021 in my respective field (Automotive Design & Engineering)

(<https://elsevier.digitalcommonsdata.com/datasets/btchxktzyw/3>), according to the Ranking of World Scientists carried out by the University of Standford. Number of sexenios (evaluation of the research activity) 3. Number of quinquenios (evaluation of the teaching activity) 5. From 2011 to 2019 I have been Director of the PhD Programme in Mechanical Engineering and Industrial Organization and from 2014, I am co-director of the Master in Railway Systems Engineering UC3M-Alstom. Since May of 2023, I am Vice-rector for Sustainable Development, Cooperation and Healthy Campuses.

I made/make **international collaborations** with the following institutions: Birmingham University (UK), University "POLITEHNICA" of Bucharest (Romania), Polytechnic Institute of Castelo Branco (Portugal), University of Beihan (China), Pontificia Universidad Católica del Perú (Perú), The Pennsylvania State University (USA) and Université Polytechnique Hauts-de-France (France).

From 2021, I am a member of the European Co-Programmed Association (**CCAM**). The goal of CCAM is to create a more user-centered and inclusive mobility system, increasing road safety while reducing congestion and environmental footprint.

I have participated in **contracts** belonging to **article 83** and **MARCO agreement** with different enterprises (Indra, FITSA, Michelin España Portugal, S.A., Recreativos Franco S.A., Construcciones Espaciales y Dragados S.A., CAF, METRO de Madrid).

I am **co-inventor** of the **patent** "System and Procedure for Evaluation of Driving Style (ES-2696401-A1)". **BooBoo Company** has been **beneficiary** of SME inside of **Lab4Pymes 2021 program** in order to make application of this patent.

I have been **Director** of 5 PhD **thesis** and, nowadays, I am supervising 3 PhD thesis. I have tutor of more than 100 degrees final projects.

I have participated in the organization of 3 international congresses and 2 national congresses.

I have been **assessor** of EMPLEA program, research projects for the Convocatoria de Ayudas de la Dirección General de Tráfico, ayudas para contratos Torres Quevedo for ANEP, projects I+D+i for ANEP, among others. I am reviewer of more than 20 JCR Journals.
